Open

Drawing on the Net

Scalable Vector Graphics (SVG) is an exciting new World Wide Web Consortium (W3C) open standard enabling high-quality, dynamic, interactive, stylable graphics to be delivered over the Web using accessible, human-readable XML.

At the SVG Open 2003 Conference & Exhibition you will have the opportunity to learn about the SVG standard, how to use it to create effective and compelling Web content, techniques for developing SVG software solutions, and the latest developments from the W3C.

SVG Open 2003 includes a program of courses, targeted at users of all levels of expertise, on Web graphic standards, technologies and solutions.

SVG Open 2003 is hosted by SchemaSoft and the World Wide Web Consortium. For all the details, visit <http://www.svgopen.org>.
